Comment Area

1. Mr. Bernard Chen is the best teacher of all the teachers in the computer science. His teaching method is just what I am looking for. I am really disappointed with all the teachers in the computer science department. They don't know how to teach and I feel like I don't have enough knowledge at all about anything. I feel they are just working for money instead of making sure we understand the materials. But Mr. Bernard Chen, he is excellent!!! He teaches everything I need to know. He makes sure that I understand everything. He teaches very slow. He show many examples of programs and explain everything line by line. All the other teachers, they don't care if the students understand or not. They love to see students fail. They spend too much time with definition instead of giving us some practice or showing programs and explaining line by line what each line means. I wish Bernard Chen could teach all of my computer science courses. He is the best and I admire his teaching skills very much. He makes a wonderful professor. I hate all the other computer science professors.
